

Tote Storage

What makes Tote storage work?

storeWALL Bracket

Our exclusive metal CamLock makes it easy to lock, unlock or relocate the bracket and tote system.

A storeWALL bracket can hold approximately 100 pounds. If the tote can hold it, the bracket will too!

Tote Handle

The tote has sturdy, built-in grip handles. The tote sits securely on the brackets and allows plenty of hand space to just grab and go!

Lewis FliPak Containers
Iris Store-It-All Heavy Duty Totes
Rubbermaid Rough Neck Totes

Storage that goes to work

Storage that is enclosed and portable; perfect for crafts, toys, tools, camping, seasonal décor and clothing. The tote goes with you and returns to the storage area. With storeWALL brackets the tote has a home that is accessible, not the bottom of a stack.

*These totes are designed to work with storeWALL.
